I, the owner, understand that this is an investigational drug for the control of recurrent clinical signs due to inflammation associated with Equine Protozoal Myeloencephalitis following antiprotozoal therapy and the general purpose of this study is obtaining effectiveness data for Food and Drug Administration’s licensing requirements. The above named test article has not been approved for sale in the United States for the claim being studied and it has not been subjected to testing for efficacy and safety. Although it is not expected, there is a risk of adverse reactions; hence, I am aware that there may be some risk associated with the use of this investigational drug. If any of the following adverse events such as increased salivation, increased sensitivity or irritability, depression, diarrhea, colic, muscle tremors, ataxia (unsteady and uncoordinated movement), seizures, or collapse occur during the course of the study I will contact the Field Investigator or the Study Monitor (352-591-3221).

Furthermore, I understand that I am responsible to administer the product and collect information regarding the animal’s health. There is also a possibility that this animal might be randomized to a placebo. The use of this test article creates an obligation not to sell animals for food following treatment as noted in the protocol.
