

### Polyneuritis Equi Examination Form

This form is to be completed by the Investigator prior to treatment and on the last day of treatment. Enrollment is dictated by the identification of animals with clinical signs consistent with PNE that meet the inclusion criteria.			
Animal ID	Study day:	Eligibility (Pre-treatment) <div style="text-align: center;"><input type="checkbox"/></div>	Day 14 <div style="text-align: center;"><input type="checkbox"/></div>
Investigator Signature		DATE	

Please conduct a clinical examination and use the point scoring system to evaluate the presence of any of the 9 indicated clinical signs consistent with PNE. Indicate absence of the clinical sign by a 0 score or indicate a 1 for presence of the clinical sign for the score and score each of the 9 clinical signs. Total the score for the presenting signs to get the Fordyce Score on line 10.

Clinical sign:	Score	Use this score for the indicated sign
1 Paresis (weakness) of tail		1
2 Perianal analgesia (loss of sensation around anus)		1
3 Dribbles or retains urine		1
4 Any cranial nerve neuropathy		1
5 Rectal dysfunction (retains feces)		1
6 Inability to blink		1
7 Gluteal muscle atrophy		1
8 Masseter muscle atrophy		1
9 Ear droops		1
